

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Currently Amended) An audio system, comprising:

a head attachment audio unit having a reproduction portion configured to reproduce audio information stored in a memory portion and an output portion configured to output sound according to the reproduced audio information; and

a remote control unit having a plurality of operation buttons, each operation button configured to implement a corresponding one of a plurality of operation modes for audio reproduction, the plurality of operation modes comprising a start reproducing audio information mode, a stop reproducing audio information mode, a reversing mode and a fast forwarding mode, the remote control unit configured to transmit a control signal that controls an the plurality of operation mode modes for audio reproduction of the reproduction portion of the head attachment audio unit.

2. (Original) The audio system as set forth in claim 1:

wherein the remote control unit transmits the control signal over radio.

3. (Previously Presented) The audio system as set forth in claim 2:

wherein the remote control unit comprises a transmitter configured to transmit the control signal, the transmitter comprising an antenna configured to transmit electromagnetic waves; and

a shield unit having an opening at a prescribed position thereof and the antenna being inserted therein.

4. (Previously Presented) The audio system as set forth in claim 1:

wherein the remote control unit is attached with a wrist-belt.

5. (Original) The audio system as set forth in claim 1:

wherein the remote control unit comprises a mechanism of attaching and detaching the remote control unit to and from a watchband.

6. (Previously Presented) The audio system as set forth in claim 1:

wherein the remote control unit is in shape of a ring.

7. (Previously Presented) The audio system as set forth in claim 1:

wherein the remote control unit is attached with an adhesive tape.

8. (Previously Presented) The audio system as set forth in claim 1:

wherein the remote control unit is attached with a chain.

9. (Original) The audio system as set forth in claim 1:

wherein the remote control unit is one body with a portable information terminal.

10. (Original) The audio system as set forth in claim 9:

wherein the audio information is downloaded through the portable information terminal to the memory portion.

11. (Original) The audio system as set forth in claim 1:

wherein the memory portion is a memory medium freely attachable and detachable to and from the head attachment audio unit body.

12. (Original) The audio system as set forth in claim 1:

wherein the memory portion is a solid memory disposed to the head attachment audio unit body.

13. (Previously Presented) The audio system as set forth in claim 1:

wherein the head attachment audio unit further comprises an input terminal configured to input audio signal.

14. (Previously Presented) The audio system as set forth in claim 1:

wherein the head attachment audio unit further comprises a mechanism capable of attaching and detaching the remote control unit.

15. (Previously Presented) The audio system as set forth in claim 1:

wherein the head attachment audio unit further comprises a response portion configured to return response signal corresponding to the control signal to the remote control unit; and

the remote control unit further comprises a reception portion configured to receive the response signal.

16. (Previously Presented) The audio system as set forth in claim 15:

wherein the remote control unit further comprises a display portion configured to display information visually based on the response signal received by the reception portion.

17. (Currently Amended) The audio system as set forth in claim 15[[:]] wherein the remote control unit further comprises:

~~a control button configured to implement control of reproduction of the audio information;~~

a transmitter/receiver configured to transmit, when ~~the control one of the plurality of operation buttons~~ is pushed down, the control signal corresponding to the pushed ~~control operation~~ button, and configured to receive the response signal corresponding to the control signal; and

a display portion configured to display information visually based on the response signal received by the transmitter/receiver.

18. (Currently Amended) The audio system as set forth in claim 17:

wherein the transmitter/receiver of the remote control unit is disposed on a same face as on which the display portion or the ~~control operation~~ button is disposed.

19. (Currently Amended) The audio system as set forth in claim 17:

wherein the remote control unit further comprises an ON/OFF ~~control operation~~ portion configured to control ON/OFF of a main power source of the remote control unit body according to an input situation from the ~~control operation~~ button.

20-23. (Cancelled)
